

Social Disparities in Kidney Transplants

Prospective Cohort Study

Factors contributing to probability of being waitlisted for

• income < \$25,000 (HRR 0.66, 95% CI 0.54-0.82)

psychosocial factors

• public insurance only (HRR 0.67, 95% CI 0.52-0.86)

• transplant knowledge (HRR 1.06, 95% CI 1.02-1.1)

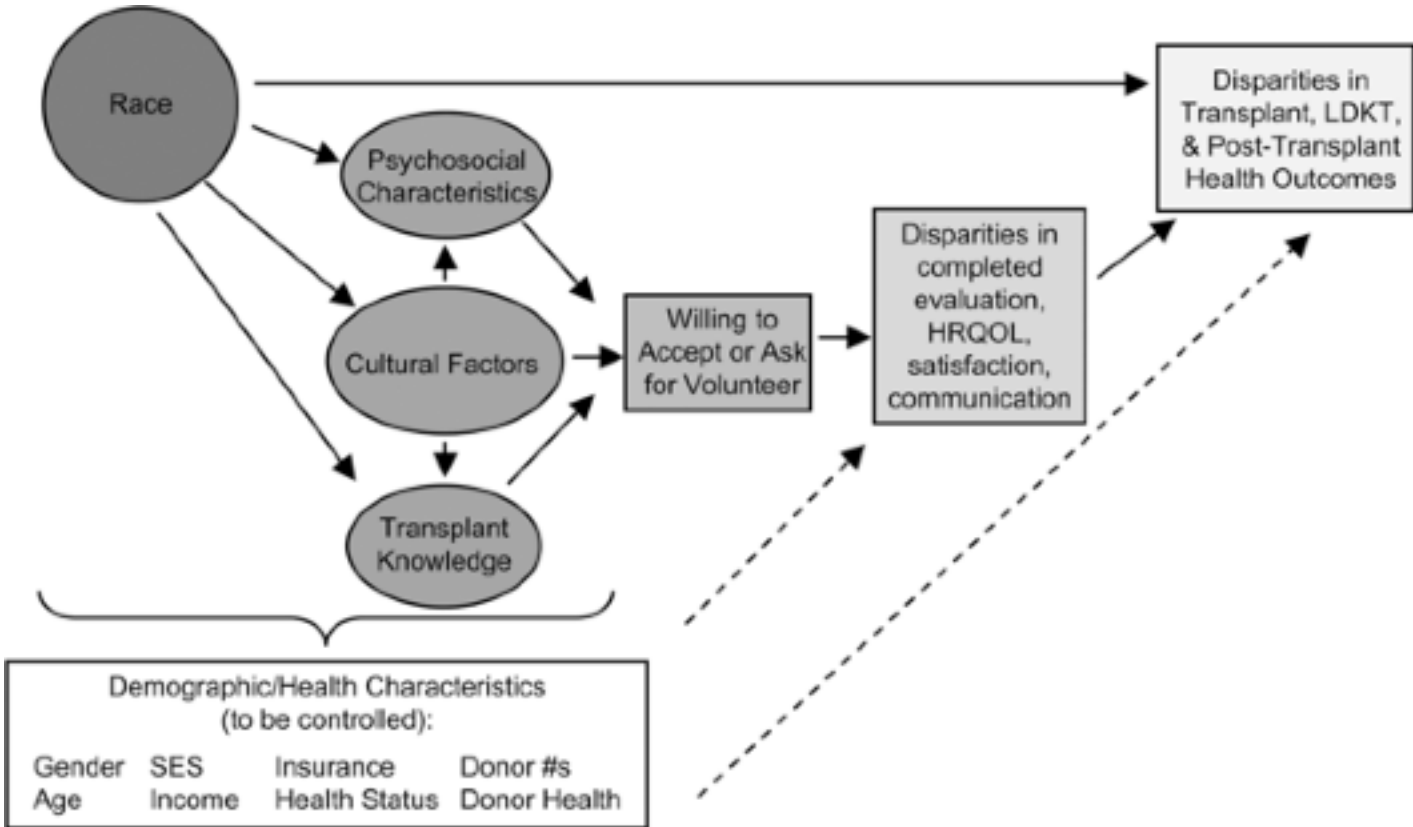

•black race (hazard ratio [HR] 0.75, 95% CI 0.59-0.96)

transplant evaluation after adjustment for

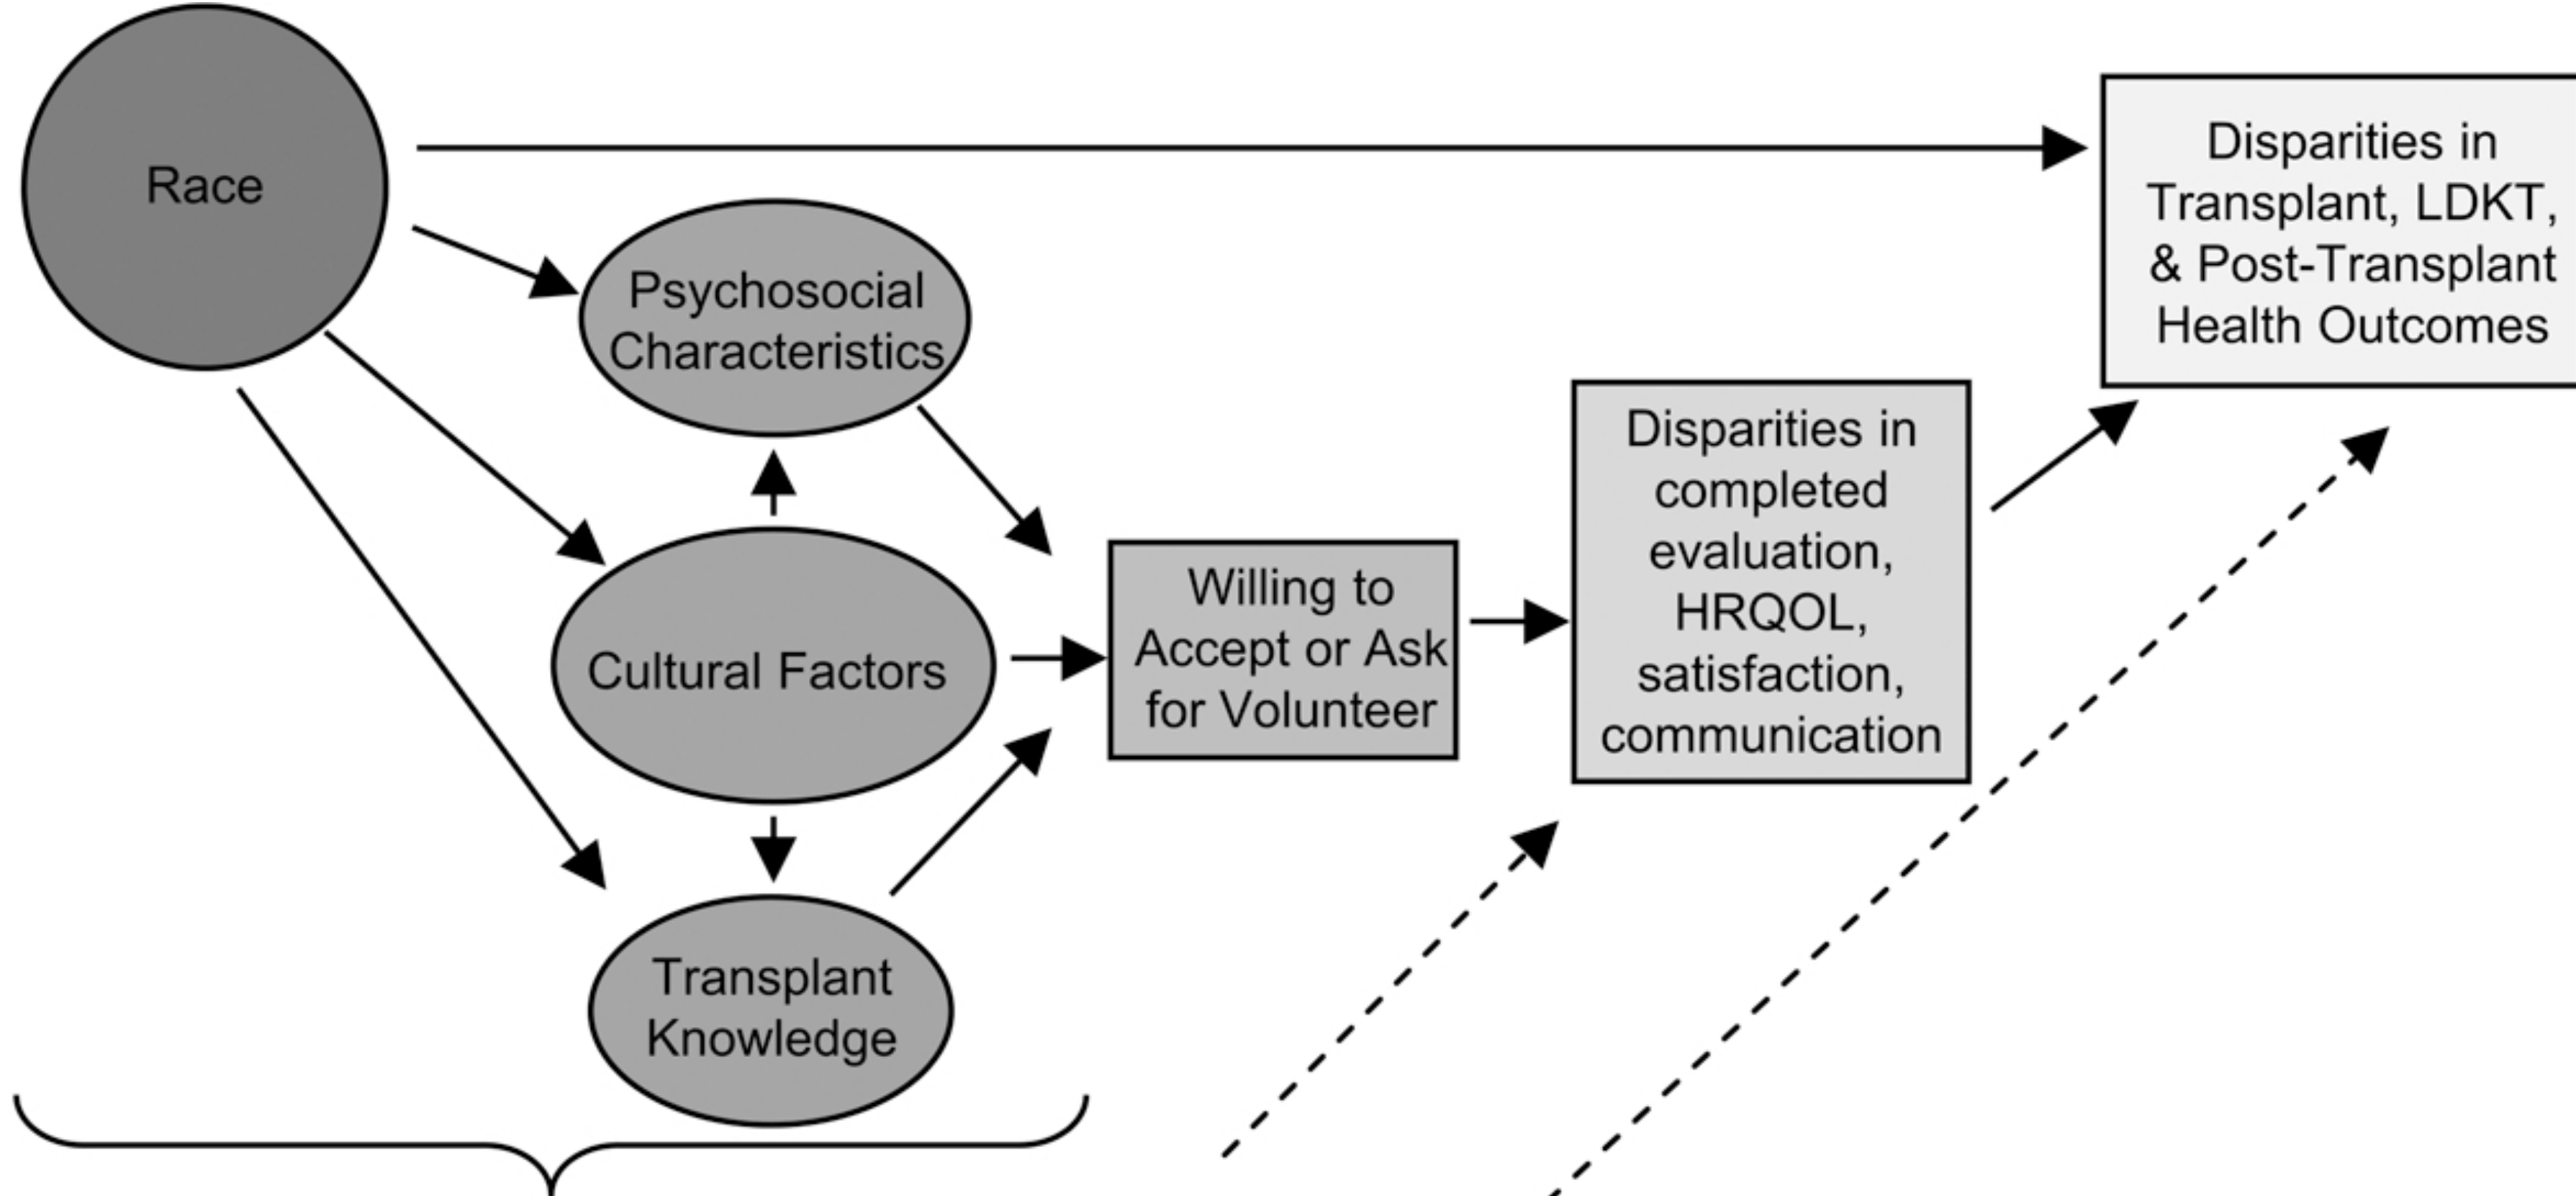

• total social support (HRR 1.03, 95% CI 1.01-1.05)

• currently on dialysis (HRR 0.62, 95% CI 0.5-0.76)
